

1)

```
package main;
public class Main {
    public static void main(String[] args) {
        for (int i = 0; i < 11; i++) {
            int multiplicacion = i * 4;
            System.out.println(i + " * 4 = " + multiplicacion);
        }
    }
}
```

2)

```
package main;
import java.util.*;
public class Main {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);
        int suma = 0;

        while (suma <= 10) {
            System.out.println("Ingrese un nuevo número: ");
            int nuevo = scanner.nextInt();
            suma = suma + nuevo;
        }
        System.out.println("La suma es: " + suma);
        scanner.close();
    }
}
```

3)

```
package main;
public class Main {
    public static void main(String[] args) {

        for (int i = 1; i < 13; i++) {
            if (i % 2 == 1) {
                System.out.print(i + "\t");
            } else {
                System.out.println(i);
            }
        }
    }
}
```

4)

```
package main;
public class Main {
    public static void main(String[] args) {

        for (int i = 1; i < 7; i++) {
            System.out.print(i + "\t");
            System.out.println(i + 6);
        }

    }
}
```

5)

```
package main;
import java.util.*;
public class Main {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);
        int suma = 0; int num; int cont=0;
        System.out.print("Ingresa Números para el promedio (0 para finalizar):");
        do {
            num = scanner.nextInt();
            if (num != 0) {
                System.out.print("Ingrese otro Número:");
                suma = suma + num;
                cont++;
            }
        }while(num != 0);
        if (cont > 0) {
            int promedio = suma /cont;
            System.out.print("El promedio es:" + promedio);
        }

    }
}
```

6)

```
package main;
import java.util.*;
public class Main {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);
```

```
int suma = 0; int cont = 0;

while (suma <= 20) {
    System.out.println("Ingrese un nuevo número: ");
    int nuevo = scanner.nextInt();
    suma = suma + nuevo;
    cont++;
}
int promedio = suma / cont;
System.out.println("El promedio es: " + promedio);
scanner.close();
}
}
```
